EDUCATION

2022 - 2026

WEST VISAYAS STATE UNIVERSITY

- Bachelor of Science in Information Technology
- Completed a thesis project on an Offline Communication and Flood Rescue System Utilizing LoRaWAN Technology.
- Participated in the 26th International Symposium on Advanced Intelligent Systems in South Korea.

SKILLS

- IT Troubleshooting & Technical Support
- Microsoft Office 365 & Google Workspace
- Basic Programming (C++, C#, Java, HTML/CSS, JavaScript)
- Network & System Fundamentals
- Cybersecurity Fundamentals
- Problem-Solving & Analytical Skills
- Teamwork & Communication
- Technical Documentation

LANGUAGES

- English (Fluent)
- Tagalog (Fluent)
- Hiligaynon (Fluent)

PROFESSIONAL SUMMARY

Bachelor of Science in Information Technology graduate with a foundation in system development, cybersecurity concepts, and technical support. Completed an internship at the National Bureau of Investigation (NBI) Region VI, contributing to system development and IT operations. Strong analytical, problem-solving, and organizational skills with experience in technical documentation, project coordination, and technology-driven solutions.

EXPERIENCE

■ **National Bureau of Investigation Region VI** JAN 2026 - APR 2026
Information Technology Intern

- With a team, developed a Case File Management System for handling and organizing case records.
- Led the initial frontend development and contributed to the system design process for the CFMS.
- Supported daily IT operations, including basic troubleshooting and system maintenance.

■ **BaHanap, West Visayas State University** JAN 2025 - MAY 2026
Co-Founder & Technical Writer

- With a team, developed a startup named BaHanap, an offline communication and flood rescue system.
- Managed documentation of the development process and tracked project expenses to ensure smooth execution and budget adherence.
- Enhanced skills in project management, problem-solving, and digital innovation

PROJECT

■ **An Offline Communication and Flood Rescue System Utilizing LoRaWAN Technology** JAN 2025 - MAY 2026
Thesis Project, West Visayas State University

- Developed a disaster-response system enabling offline communication during severe floods to help rescuers and affected communities exchange real-time alerts and location data even without cellular or internet connectivity.
- Contributed to documentation of the development process, technical writing, and expense tracking for project management.
